General Astronomy · Popular Science

DESCRIPTION

Astronomical outreach work by astronomer Lluis Rodés, who had the opportunity to train and perfect his knowledge at the great centers of world astronomy in the first third of the twentieth century. Thus, he was able to work for a year at the Mount Wilson observatory in California, which at that time had the largest telescope in the world. He also conducted astronomical studies at Harvard. In 1920 he was appointed director of the Ebre Observatory.
